DETAILED ACTION

Election/Restrictions

Newly submitted claims 60-69 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: Applicant's newly added claims are directed to an independent and distinct species from that of the originally elected claims 22 and 38.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 60-69 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 22 is rejected under 35 U.S.C. 102(b) as being anticipated by Ohkouchi et al (Proceedings of 12th Symposium on Alloy Semiconductor Physics and Electronics, 1993, pages 337-340: Applicant's Admitted Prior Art described on Col.2, lines: 3-10 in US 5904549).

In reference to claim 22, Ohkouchi (Applicant's Admitted Prior Art) teaches a method comprising:

Forming an alloy semiconductor by an MOCVD method at a pressure of at least that of convention low pressure MOCVD (Col.2, lines: 5-10) , using a nitrogen containing organic compound as a source material for nitrogen, wherein the nitrogen containing organic compound is selected from the group consisting of monomethylhydrazine, dimethylhydrazine and tertiary butylamine (Col.2, lines: 5-10 (DMHy)), and using a source material for As, wherein the III-V alloy semiconductor comprises at least Ga, In, N and As (Col.2, lines: 5-10).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 38 is rejected under 35 U.S.C. 103(a) as being unpatentable over Ohkouchi et al (Proceedings of 12th Symposium on Alloy Semiconductor Physics and Electronics, 1993, pages 337-340.

Art Unit: 2813

In reference to claim 38, Ohkouchi fails to explicitly teach using a horizontal LP MOVPE reactor apparatus as claimed by the Applicant; however such apparatuses are well known in the art of semiconductors and would be considered to be an obvious choice among skilled artisans.

Response to Arguments

Applicant's arguments filed 6/27/05 have been fully considered but they are not persuasive. Applicant argues that Ohkouchi fails to teach a III-V alloy containing Ga and N- however this is not persuasive; the GaAsN anticipates this element of Applicant's claim.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
